

# Jay Hilwig

Designing clarity in complex systems.

Olympia, WA | [jhilwig.com](http://jhilwig.com) | [linkedin.com/in/jayhilwig](https://linkedin.com/in/jayhilwig) | [github.com/jayhilwig](https://github.com/jayhilwig) | [jayhilwig@gmail.com](mailto:jayhilwig@gmail.com)

SUMMARY

Product Designer with 20+ years across Amazon, Microsoft, and Nuance — spanning customer support, fraud and risk, trust, and identity security at enterprise scale. I pair systems-level UX strategy with hands-on technical depth: shipping AI-assisted products end-to-end in React, TypeScript, and LLM APIs, and partnering directly with engineering and security teams on data models, not just screens.

Selected outcomes.

Customer, operational, and AI-assisted systems measured by what changed for customers and the business.

Purchase impact

+2%

purchase rate, -6% returns — Amazon Transparency

Buyer Risk Prevention

~5 min

account resolution, down from 2-3 days (-2% FP, -5% FN)

Onboarding speed

8 → 2 wks

new CS rep onboarding, via guided workflows

EXPERIENCE

Amazon

- Senior UX Designer — Identity Security & Access (ISAP)

  - Designed identity security and authentication experiences used by 1M+ fulfillment associates, partnering directly with security and platform engineering on workflow and data-model decisions.
  - Applied systems-level design thinking to authentication flows spanning multiple internal tools, access tiers, and verification states.
- Senior UX Designer — Transparency

  - Designed customer touchpoints across Search, Detail Pages, Progress Tracker, and Amazon Lens — unifying a fragmented multi-surface system into one trust-and-verification flow.
  - Contributed to a 2% increase in purchase rate and 6% fewer returns for enrolled products by redesigning end-to-end trust signals.
- Senior UX Designer — Buyer Risk Prevention (BRP)

  - Connected customer recovery, investigator decision support, and structured data across a high-stakes risk system, turning fraud signals into decision-support interfaces.
  - Improved account resolution from 2-3 days to roughly 5 minutes, while reducing false positives 2% and false negatives 5%.
- Senior UX Designer — Customer Service Tech (CS)

  - Designed internal guided workflows for Customer Service representatives, cutting new-hire onboarding from 8 weeks to 2 weeks.
  - Established step-by-step, guided-decision interaction patterns later reused across Risk and Transparency programs.

Aloft Appraisal

- Senior Product Designer

  - Modernized an AI-assisted appraisal platform around field population, auto-calculations, visual comparisons, and decision support.
  - Helped compress appraisal report completion from 2-4 hours to roughly 45-60 minutes.

Earlier Experience

- Nuance — Principal UX Designer

  - Designed product and UX work in speech, mobile, and intelligent-interface environments, at the intersection of automation and human judgment.
- Microsoft — Product Designer

  - High-end prototyper in Microsoft's MSNBC org — built a BillG prototype for next-gen MSNBC, then Office Business Apps (OBA).
- Startups (SNAPin / Centri Tech / Pyng.me) — Product Design

  - Contributed to product direction, interaction design, and mobile UX across acquired and early-stage products.

AI & TECHNICAL PROJECTS

- Tabum

AI-assisted news aggregation and summarization — source ingestion, scheduled processing, Vercel v0 prototyping.
- Shape of AI

Interactive exploration of AI product shape, model behavior, and interface patterns.
- Docuformer

AI-assisted PDF/document automation prototype for parsing, cleaning, and transforming forms.
- Also shipped: Dissolvr (Expo/React Native), Hide AI Chatbots (Chrome extension), Search for GPT (browser extension) — see GitHub.

SKILLS

0→1 product strategy, AI-assisted workflows, Claude, CSS, Data modeling, Design systems, Enterprise UX, Expo, Figma, Front-end prototyping, GitHub, HTML, Interaction design, JavaScript, LLM APIs, OpenAI, OpenRouter, Playwright, Prompt design, Railway, React, Supabase, TypeScript, Vercel

EDUCATION

- MS, Human Computer Interaction

Iowa State University
- BFA

Hartwick College

PATENTS

- Microsoft patent
- Amazon Inventor
