PROFILE

I design clarity into complex products. Product designer focused on identity, trust and safety, fraud, and AI-assisted workflows. I connect research and systems-level UX with hands-on prototyping in React, TypeScript, and LLM APIs.

EXPERIENCE

Independent Product Design & Development 2026 – Present

Self-directed products and prototypes · Selected work

Tabum

Designed and built an AI-assisted news product for multi-source coverage, summarization, and editorial workflows; implemented source ingestion and scheduled processing.

VantSide · In development

Designing and implementing an AI-supported desktop interview-practice experience with live cues, session management, and structured review.

Docuformer

Prototyped AI-assisted PDF and document workflows for extracting fields, cleaning inputs, and transforming forms.

Amazon · RUN Studios contract Jun – Dec 2025

Senior UX Designer · Identity Security & Access (ISAP)

Designed shared authentication workflows across kiosks and handheld devices for operational systems serving more than 1 million fulfillment associates.

Aligned identity experiences spanning badge, PIN, and FIDO verification; collaborated with security and platform engineering on complex flow and state decisions.

Aloft Appraisal May 2023 – May 2024

Senior Product Designer

Modernized AI-assisted appraisal workflows, including field population, calculations, visual comparisons, and decision support; helped reduce report completion from 2–4 hours to 45–60 minutes.

Developed the Sound UI design system and informed product direction through interviews, roundtables, surveys, and behavioral insights.

JAY HILWIG / PRODUCT DESIGNER

Amazon

Oct 2014 - Mar 2023

Senior UX Designer

Transparency · 2020–2023

Unified customer trust and product-authenticity experiences across Search, product pages, progress tracking, and Amazon Lens.

Contributed to a 2% increase in purchase rate and 6% fewer returns for enrolled products by improving trust signals and verification workflows.

Buyer Risk Prevention · 2017–2020

Designed customer recovery and investigator decision-support tools connecting fraud signals, structured data, and high-stakes decisions.

Reduced account resolution from 2–3 days to roughly 5 minutes, while lowering false positives by 2% and false negatives by 5%.

Customer Service Tech · 2014–2017

Designed guided support workflows and reusable decision patterns, cutting customer-service representative onboarding from 8 weeks to 2 weeks.

Nuance Communications

2010 - 2013

Principal UX Designer

Designed speech, mobile, and intelligent-interface experiences where automation supported human decision-making.

Additional product design work SNAPin, Centri Tech, and Pyng.me — early-stage and acquired product teams.
